

## BENEFITS

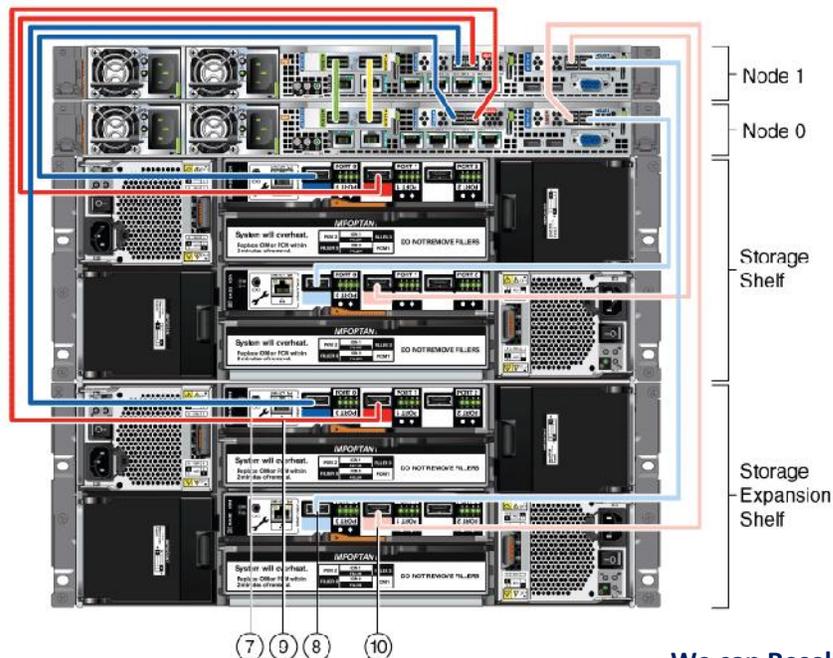

- **Deployment Simplified** – Simplified deployment, maintenance, and support of high-availability database and application workloads. Saves up to 2,000 hours of labor over a three-year period with simple deployment, maintenance, and support of database workloads, all supported by Oracle
- **Scalable and Pay-as-you-use** – Capacity On-Demand software licensing allows you to scale from 2 processor cores to 72 without incurring the costs and downtime associated with hardware upgrades
- **Save ongoing maintenance time with Consolidation** – Allows businesses to consolidate Applications, OLTP and data warehousing databases up to 128 terabytes in size, making it ideal for midsize to large organizations
- **Easy to Virtualize** - Virtualization support enables customers to quickly deploy complete, highly available solution appliances to remote branch office locations
- **Packed as In-a-Box Solution** – Allows you to completely package software's, servers, storages, and networking for enterprise wide usage. EAInfoBiz specializes in packaging ERP Application, Database, 3<sup>rd</sup> Party Applications, Virtualizations in Box as a complete solution

**EAInfoBiz Inc.** was founded in early 2013, and is built on the client first business approach, with a goal of providing measurable value to our clients - by reducing time to deploy projects and consistently deliver quality solutions.

Our Technology services group has extensive experience in delivering value-driven solutions that address the evolving needs of simple, reliable and affordable engineered system that can be deployed seamlessly within your infrastructure.

## Why do you need an Oracle Database Appliance (ODA)?

- **If you need high availability**- It is a high availability clustered system that includes software, servers, storage, and networking, all engineered to work together; and
- **If you need to pay-as-you-grow** - Customers can start small, licensing only the processor cores they use and purchase additional licenses as their business demand grows for both databases and applications; and
- **If you need to scale up or down** – Customers can scale up to a total of 72 processor cores and up to 1.5 TB of memory per appliance; and
- **If you need to maximize on processing speed** - Utilization of the full Oracle Database Appliance processor core capacity regardless of the database processor core usage; and
- **If you need flexibility in virtualization** - Oracle Database Appliance Virtual Platform provides isolation between database and application workload; and
- **If you need to reduce time and cost to maintain infrastructure** - The Appliance Manager software also automates patching the entire stack including the database, operating system, and firmware in a simple process.

**Solution-In-a-Box**  
Fully integrated and redundant system of software, servers, storage and networking that delivers high-availability database services for a wide range of applications

**We can Resell Oracle Hardware and Software including ODA**

**Services** Strategy | Consulting | Managed Services | BPM | Cloud | Mobile

### Consulting Services

Business and Technology leaders have to ensure that the solution is sustainable, within budget and achieves business targets on time. We can help. Our team has the right combination of business and technology experience to advise you with innovative solutions to not just meet your IT needs, but also enhance the out-of-the-box functionalities offered by leading products.

### Cloud Services

Businesses need an agile platform to quickly build, test, and scale new application services and react to the digital disruption occurring in their markets. Digital disruption is accelerating because of the increasing integration of processes and information to yield real-time decisions. Our Cloud Services Group leverages Microsoft Azure, Soft Layer and Oracle Cloud platforms as a service to rapidly build and deploy rich applications.

### Managed Services

When it comes to Oracle Application support services, you need a provider you can rely on, which isn't always easy when you have internal team members with differing experience levels, especially in complex situations. It can seem as if you alone are responsible for shouldering the burden of diagnosing problems and at the same time trying to source multiple roles. We have dedicated teams in both Toronto and NY to assist you at all times.

### Fixed Price Services

#	Service Offerings	Inclusions	Fees
1	<b>RACK and Setup</b>	Setup, Racking nodes, one storage node, setup console, configuration, external cabling and Certification Report	\$1000 CAD
2	<b>Storage Additions</b>	Add and Setup Storage Expansion	\$800 CAD
3	<b>Virtualization</b>	ODA Deployment with VM for Database and with one VM for application	\$7400 CAD
4	<b>Training</b>	Conduct 1 Day Onsite Training based on your requirement	\$1650 CAD
5	<b>Proof of Concept</b>	Basic Deployment with non-virtualization platform or basic virtualization with no guest VM	\$2500 CAD
6	<b>Patching</b>	Patching of Infrastructure components - disk, firmware, OS, virtualization, ILOM and drivers, Oracle DB and Grid /ASM	\$4000 CAD

### Time and Material Services

#	Service Offerings	Inclusions
1	<b>Configuring and Setting Up ASR, Disaster Recovery, Backup</b>	Our Technical Architects will lead the Requirements Gathering workshop and then design the advance configuration to best fit your requirements with embedded leading practices. We will additionally create and execute thorough unit testing to ensure the advance configuration can be tested in isolation and tuned to demonstrate higher than expected performance.
2	<b>PeopleSoft In-a-Box</b>	We can take individual or combination of PeopleSoft Apps and help you successfully transition your current development / testing / Support / QA and Production environments to a ODA to provide high availability enabled scalable PS-Solution-In-a-Box.
3	<b>JD Enterprise One-In-a-Box</b>	Similarly, we have the expertise to deliver JDE-Solution-In-a-Box and add other Apps like EBusiness / PeopleSoft / Third Party Apps to provide a comprehensive solution
4	<b>Oracle Ebusiness-In-a-Box</b>	Similarly, we have the expertise to deliver EBUS-Solution-In-a-Box and add other Apps like JD Edwards E1 / PeopleSoft / Third Party Apps to provide a comprehensive solution
